JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

April 30, the steamship *Sicilia*, of the Navigazione Generale Italiana, bound with passengers and cargo for New York. There were inspected and passed 944 steerage passengers and 50 pieces of large baggage; 1,200 pieces of baggage were disinfected by steam.

May 1, the steamship *Trave*, of the North German Lloyd Line, bound with passengers and cargo for New York. There were inspected and passed 670 steerage passengers and 50 pieces of large baggage; 800 pieces of small baggage were disinfected by steam.

May 3, the steamship *Cambroman*, of the Dominion Line, bound with passengers and cargo for Boston. There were inspected and passed 964 steerage passengers and 160 pieces of large baggage; 1,200 pieces of baggage were disinfected by steam.

May 3, the steamship *Balilla*, of the Celli Line, bound with passengers and cargo for New York. There were inspected and passed 1,088 steerage passengers and 130 pieces of large baggage; 1,300 pieces of small baggage were disinfected by steam.

Respectfully,

J. M. EAGER,

Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

JAPAN.

Report from Yokohama—A death from plague at Kobe, April 22.

YOKOHAMA, JAPAN, April 28, 1902.

SIR: I have the honor to transmit herewith abstract of the bills of health issued at this office during the week ended April 26.

The port of Yokohama remains free from quarantinable disease. During the past week there were officially reported 2 cases of enteric fever with 1 death; also 1 case of dysentery. On the 22d instant there was a death from plague at Kobe, since which date no case of quarantinable disease has been reported to me as occurring in Japan proper—i. e., outside of Formosa.

Respectfully,

DUNLOP MOORE.

Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

MEXICO.

Report from Vera Cruz—Increase in yellow fever.

VERA CRUZ, MEXICO, May 11, 1902.

SIR: I have the honor to make the following report for the week ended May 10:

There were reported 17 cases and 9 deaths from yellow fever, 2 cases of smallpox, and 44 deaths from all causes. Twelve new cases of yellow fever were reported yesterday. From the distribution of the cases in different parts of the city and the decided increase of the disease in twenty-four hours, it looks as if there would be plenty more cases during the summer.

Respectfully,

S. H. HODGSON.

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.
